Did you know...
 that Mølbros landsides are longer than original landsides.
 This feature gives your plough much more stability while
 ploughing which makes it easier to control the plough.

Did you know...
 that the upset forged front of the share gives an extra
 support for the reversible point or EUROPOINT and is
 designed to ensure that it is easy to get the plough into the
 soil.

Did you know...

that the carbide coating is always on the backside of Mølbros EUROCARBID points. This gives the point a self-sharpening effect so it always attacks the ground optimal - even if it is almost worn.

Did you know...

that the carbide coating is cohesively connected with the base material which ensures optimal durability of the coating. This means that the coating cannot fall of - it can only be worn down.
